**FERCHAU** 

**Taking technology to the next level. Facing up to challenges and working on the innovations of tomorrow - for this, we at FERCHAU need experts like you: as someone ambitious who, like us, wants to take technology to the next level. We are involved in exciting projects for well-known customers in the aerospace industry and take on responsibility for complex development projects. Do you want to fully realise your potential? We offer you an environment with diverse tasks, new challenges and constant opportunities with which you can grow and hone your profile.**

## **Aerospace Engineer (m/f/d)**

 Hybrid  Full time  45,000 - 60,000 €

 Bremen, Germany

### **This will be your future job**

- Helping to shape the future of manned space travel
- Co-development of intelligent systems for space missions
- Development, optimization and analysis of assemblies for spacecraft
- Collaboration with cross-functional teams from mechanics, avionics and more
- Carrying out tests and validation of components
- Preparation of technical documentation and reports
- Participation in design reviews and technical meetings

### **Your benefits at FERCHAU**

- Fascinating and pioneering development of technological solutions for defense and security in the aerospace industry
- The opportunity to further develop yourself in a talented and international team
- Excellent capacity to balance your personal, family and professional commitments with flexible working time models
- Plentiful career opportunities within our team: individual professional development in various soft and hard skills at several institutes, as well as ready-made technical career paths for long-term development prospects
- Numerous additional benefits through our BAP collective agreement including corporate benefits, as well as regular team and sports events to support a healthy work life balance

### **Your profile**

- A degree in aerospace engineering, systems engineering, electrical engineering, mechanical engineering or a comparable field of study
- Enthusiasm for aerospace technology and complex technical systems
- Initial or in-depth experience in systems engineering or development and design - we are looking for both junior and senior profiles
- Team spirit, initiative and a structured working style

**Looking for the next challenge? Then we should definitely get to know each other! We look forward to receiving your application online quoting reference FE86-67965-AVBRE to Ms. Inna Wulf. Let us get to the next level together and take technology forward!**
